

## CONCLUSION

This report lays the groundwork for determining recommendations that can help achieve the vision for transportation in Adams County. This existing conditions assessment and preliminary opportunities will be paired with feedback from the public and recommendations from the *Comprehensive Plan* and *Parks, Open Space, and Trails Plan* in order to identify projects, programs, and policies that are prioritized along with guidance for implementation. These recommendations will align with and enhance the three plan values of equity, sustainability, and livability. These lenses will ensure that the TMP creates a framework for transportation in Adams County that fosters diversity, reduces reliance on the single-occupancy vehicle, is fiscally-minded, and promotes comfortable walking and biking for all users.
